

Social Booth Settings - Templates

Modified on: Sun, 30 Aug, 2015 at 2:25 AM

The screenshot shows the 'Social Booth Settings - Templates' interface. The top navigation bar includes tabs for General, Display, Templates (selected), Filters, Animated GIFs, Green Screen, Printing, Video, Triggers, Extras, and Registration. Below this are sub-tabs for Email, Facebook, Twitter, SMS, Pinterest, FTP, Smugmug, Surveys, Reports, Queue, and QR Code & PB Cloud. The main settings area is titled 'F1 SETTINGS' and contains several controls: 1. Preset: A text field with '4 Shot-Strip-A-1240x1844' and a 'SAVE PRESET' button. 2. # Shots: A numeric input field with '4' and a subtext '(Camera shots. Max 8)'. 3. # Photos: A numeric input field with '8' and a subtext '(Layout photos. Max 8)'. 4. Display Single Strip: A checkbox that is checked, with a subtext '(Check if printing double strips)'. Below these are five buttons: 5. SELECT LAYOUT, 6. CHANGE BACKGROUND, 7. ADD OVERLAY, 8. ADD LOGO, 9. ADD TEXT, and 10. X, Y COORDINATES. The central part of the interface shows a 2x4 grid of photo placeholders, each with a number from 1 to 4. At the bottom, there are 'Quit' and 'Save & Start' buttons, and a 'Recommended Template Sizes' link with a question mark icon.

1. Preset

Shows the currently selected preset. Change the name here to save as a custom layout

2. # Shots

This should be the number of photos the system will take

3. # Photos

This is the number of photos on the template. A two strip print with 4 shots will have 8 photos. **To change the location or size click on the photo click on the photo and drag to the correct position. To resize, hold the control key and navigate to the upper right corner of the photo and drag to size.**

4. Display as Single Strip

This option will show a template designed with two strips as just a single strip for social sharing and on the final share screen.

**** Work from left to right when using the template editor buttons. Changing the layout after adding the overlay will delete your overlay****

1. Select Layout

This will open the quick select layout editor. Choose from one of the multiple templates we have built in for you.

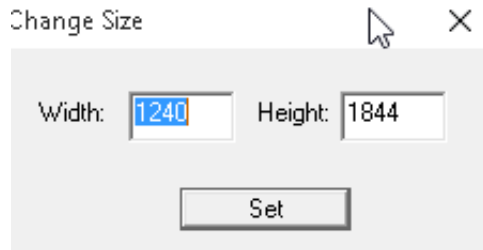

(<http://imgur.com/UZBbhMd>)

2. Change Background

Choose image, color or size to change the background.

- Image will open a navigation window to select the file.
- Color will open a color selection window

- Size will open a window to designate the size of the new template.

(<http://imgur.com/axc812L>)

- **Add Overlay**

Opens a navigation windows for you to select the overlay file. This should be a PNG-24.

- **Add Logo**

Opens a navigation window for you to select the logo file.

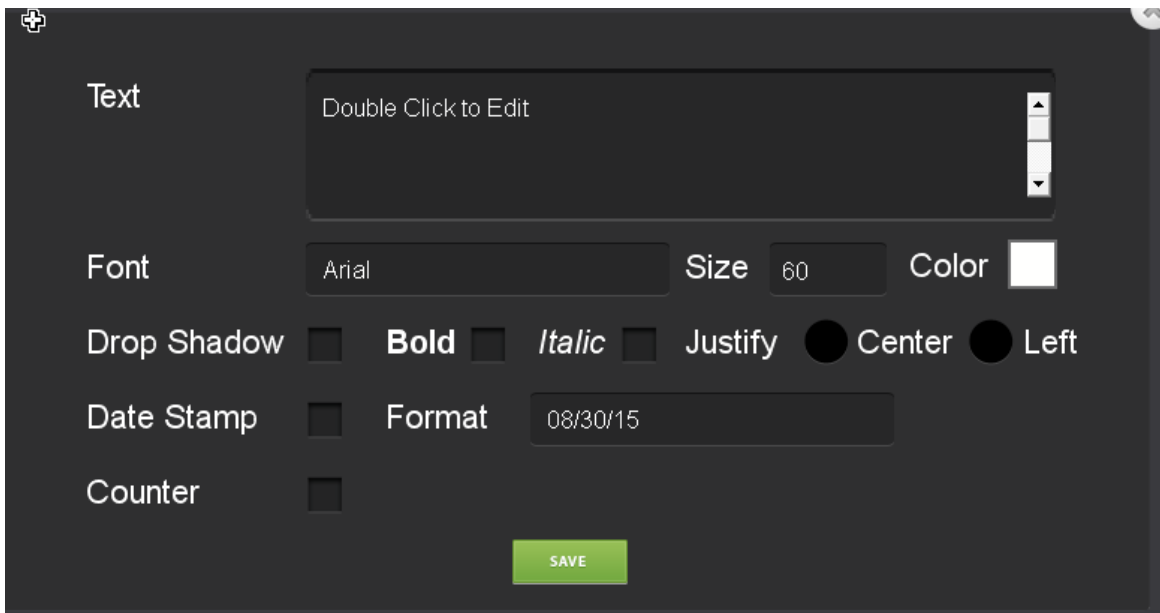

- **Add Text**

Adds the default text "Double Click to Edit". Double click on the text to edit the default message, color, font, size, etc.

*Changes should be made on the left of a double strip template and will be duplicated on the right template.

(<http://imgur.com/4k7lXp8>)

- **X,Y Coordinates**

Opens the manual adjustment windows. Use this to change photo size, location, rotation by pixels rather than dragging.
